

NOTICE

About precautionary measures on prevention of human swine influenza

In view of the outbreak of swine influenza in Hong Kong, HITEC has started to implement the following precautionary measures at the end of April, 2009 to prevent the spread of swine influenza:

1. Cleaning of all public facilities including tower lobby, entrances, corridors, lifts, lavatories and all handrails with 1:99 diluted bleach on a regular basis;
2. Sterilized carpets have been placed at main entrance of the building;
3. Provide alcohol-based handrub, masks and infrared cutaneous thermometer at information counters;
4. Ensure all ventilation systems at all public facilities including tower lobby, corridors and lavatories function properly;
5. All frontline staff conduct body temperature check on a regular basis and will wear mask whenever necessary;
6. Guidance notes are posted to remind tenants and guests to maintain their personal hygiene.

In addition, all convention and exhibition venue facilities are being cleaned regularly, and alcohol-based handrub is placed outside each venue for guests' usage.

Should there be any enquiries, please feel free to contact our Customer Services Unit at 2620 2626.
